## PSYCHIATRY EXAMINATION

### EXAMINEE PERFORMANCE REPORT

ID: 000000000

Name: Student A

000000 - Generic Medical School

Total Equated Percent Correct Score: **74**

Test Date: Month Day, Year

#### Interpreting Your Content Area Results:

- **Your equated percent correct (EPC) scores** indicate the percentage of the content that you have mastered. EPC scores are statistically adjusted to account for slight variations in exam form difficulty and may be slightly lower or higher than the actual percentage of questions you answered correctly on this specific exam form.
- **Your total EPC score is the best available estimate of your performance on this exam**, but all scores have some amount of imprecision. If you tested again without learning or forgetting anything, your total EPC score would fall within 4 points of your current score two-thirds of the time.
- **The comparison group average EPC score** for this exam represents the performance of first-time takers from LCME-accredited medical schools who tested with standard timing, between mm/dd/yyyy and mm/dd/yyyy, at the end of a clerkship. For recent administrations, the total EPC score mean and standard deviation for this group were 82 and 10, respectively.
- **The green boxes** indicate whether your performance was statistically lower, about the same, or statistically higher than the performance of the comparison group after taking into account the precision of each content area score. Content area EPC scores are less precise than total test EPC scores, so small differences in content area scores should not be overinterpreted.
- **You may use this report to identify areas of strength and weakness.** Keep in mind that some content areas are more difficult than others, and some comprise larger portions of the exam. The percentage of questions for each area may not add up to 100%.

	Comparison Group					% of Questions
	Your EPC Score	Average EPC Score	Score Comparison:			
			Lower	Same	Higher	
Performance by Organ System/Topic						
Psychotic Disorders	90	81				10 - 11%
Anxiety Disorders	66	85				12%
Mood Disorders	69	83				16 - 20%
Substance Use Disorders	65	85				11%
Diseases of the Nervous System	73	77				12 - 14%
Performance by Physician Task						
Diagnosis, including Foundational Science Concepts	73	83				61 - 65%
Pharmacotherapy, Intervention & Management	73	82				30 - 33%
