Detailed Analysis by Content
Patient Group: Adult (18–65)
Patient Group: Older Adult (66 and older)
Patient Group: Pediatric (birth–17)
Physician Task: Applying Foundational Science Concepts
Physician Task: Diagnosis
Physician Task: Health Maintenance, Pharmacotherapy, Intervention & Management
Physician Task: Professionalism, including Legal and Ethical Issues
System: Behavioral Health
Physician Task: Systems-based Practice, including Patient Safety
System: Cardiovascular
System: Endocrine
System: Female Reproductive & Breast
System: Gastrointestinal
System: Immune
System: Male Reproductive
System: Multisystem Processes & Disorders
System: Musculoskeletal
System: Nervous Systems and Special Senses
System: Pregnancy, Childbirth, and the Puerperium
System: Renal & Urinary
System: Respiratory

<b>System: Skin &amp; Subcutaneous Tissue</b>
<b>Topic: Environmental Disorders</b>
<b>Topic: Toxicologic Disorders</b>
<b>Topic: Traumatic Disorders</b>

\*Because this assessment is designed to be integrative, many items contribute to more than one score category.

The table below provides a history of your performance on the last six assessments you have completed, since February 20, 2024, along with test date and timing information. The test date corresponds to the date you completed each assessment. A score interpretation guide has been included at the end of this report to help you interpret your Assessment Scores.

Take	Test Date	Timing	Assessment Score
1	mm/dd/yyyy	Standard	16
2	mm/dd/yyyy	Standard	18

**Emergency Medicine Self-Assessment**

**Score Interpretation Guide**

This guide will help you interpret the Assessment Score you received on this self-assessment.

The scores on this self-assessment are scaled to have a mean of 20 and a standard deviation of 3 based on a recent group of fourth-year examinees who took the Emergency Medicine Subject Examination for the first time. The following information is provided in response to user requests to “translate” this self-assessment score to the clinical science subject examination equated percent correct scale. The NBME does not warrant that any individual performance on the self-assessment will predict performance on the clinical science subject examination and cautions users of this self-assessment against making any predictive inferences.

In the following table, locate your self-assessment score and find the approximate corresponding subject examination score in the adjacent column. For example, if your self-assessment score is 20, it approximates an Emergency Medicine Subject Examination score of 75.

<b>Emergency Medicine Self-Assessment Score</b>	<b>Approximate Subject Examination Score</b>
28	98
27	94
26	92
25	90
24	86
