

JOHN P. HUBBARD AWARD

Hubbard Award Recipients

After an accomplished career in pediatric cardiology, Dr. John P. Hubbard joined NBME in 1950. Over the next 25 years, he helped transform the organization from a small center for annual licensure-related certification exams to one that served more than 136,000 students and physicians at all stages of medical education.

Since its founding in 1983, 41 recipients have been honored with the Hubbard Award.
