

**This document applies to examinees preparing for Step 2 CK whose CCSSA or CCSE Examinee Performance Report shows an estimated probability of passing within a week identified as “last updated on October 15, 2024.”**

While Examinee Performance Reports and INSIGHTS® are being updated to reflect the new Step 2 CK passing standard of 218 (effective July 1, 2025), examinees may receive probabilities based on the previous standard of 214.

- If your CCSSA or CCSE performance report includes an estimated probability of passing Step 2 CK “last updated on October 15, 2024,” please refer to the table below. It reflects recalculated probabilities using a more recent cohort of examinees and the new passing standard of 218.
- Because the standard has increased, probabilities from October 2024 may overestimate your likelihood of passing and should not be used to assess readiness for Step 2 CK.
- We encourage you to use the updated table to interpret your results accurately and make informed decisions about your readiness. Your total score, content area scores, and question-level feedback are unaffected by the passing standard change.

CCSSA/CCSE Total Score	Estimated Probability of Passing Step 2 CK Within a Week	CCSSA/CCSE Total Score	Estimated Probability of Passing Step 2 CK Within a Week	CCSSA/CCSE Total Score	Estimated Probability of Passing Step 2 CK Within a Week
