

**The Edward J. Stemmler, M.D. Medical Education Research Fund
Final Narrative Report**

Instructions for Principal Investigators: Please complete a final narrative report for your project (as instructed below) along with your fiscal report by the due date noted in your contract to stemmlerfund@nbme.org

1. Please provide a summative narrative account or description of progress toward **achieving the specific objectives outlined in the grant** within the grant period. This report is meant to capture what has been accomplished by the expenditure of funds; if there are differences in what was proposed and the outcomes of the project, please explain fully. The report should be in **publishable form** and supplemented by appendices, for example, samples of instruments developed. The report should include the following:
 - a. The primary objectives and related accomplishments of the project;
 - b. The techniques or approaches used, to the degree necessary for comprehension; and
 - c. The findings and implications stated as concisely and informatively as possible.
2. List and briefly describe primary data, samples, inventions, software, etc., created or gathered in the course of research, and how they have been (or will be) made available to the research community (publications, presentations).
3. Please attach copies of all publicity on this research project which have not yet been forwarded to the NBME over this grant period.
