

INSIGHTS for Institutions Promo Video

Narrator: Your time is best spent shaping learning outcomes, helping students to become competent, compassionate physicians, not tracking down the data you need to do it. That's why we've created an easier way to put NBME assessment data to work, one that empowers you to act early and intentionally to support student learning.

On-screen: [INSIGHTSSM available for institutions.]

Delivered via the MyNBME services portal, INSIGHTS provides faculty and administrators with centralized permission-based access to NBME assessment data. And with this direct connection, it's always current and ready to use.

On-screen: [

- Subject Exams
- Self-Assessment Services
- Customized Assessment Services]

No upload process, no manual reconciliation. That means less time managing data and more time for supporting students and advancing learning outcomes.

For advisors, that can start before you ever sit down with a student. Easily look up any student, review their recent NBME assessment results in one structured view, and walk into support conversations better prepared. Or proactively identify students who may need support so you can step in sooner.

For those shaping the curriculum, INSIGHTS allows you to cleanly export authoritative NBME data, making it easier to ground decisions in reliable evidence. A better way to access data, a real difference in how your institution supports students, from the advisor invested in one student's learning journey to those shaping decisions for many.

INSIGHTS, now available for institutions.
