

NBME Academy: INSIGHTS Module 1

Kristen: Welcome to module one of Using Insights to Support Student Success, a collaboration with the Medical Education Learning Specialists or MELS group.

My name is Kristen Copolla. I'm a cognitive psychologist and an associate professor in the cognitive skills program at Rutgers Robert Wood Johnson Medical School.

On-screen: [Kristen Copolla, PhD. Cognitive Psychologist and Associate Professor. Rutgers Robert Wood Johnson Medical School.]

In my role, I work closely with medical students as a learning specialist, helping them develop strategies for success throughout medical school. I also serve as chair of the Association of Medical Education Learning Specialists, a national community of professionals who provide academic support to students in MD and DO programs.

Kiely: My name is Kiely Madhavan. I'm a neuropsychologist and learning specialist at Creighton University School of Medicine. I'm also an assistant professor in the Department of Medical Education and the chair elect of MELS.

As Kristen mentioned, our role as learning specialists is to support students throughout their journey to becoming physicians. Our primary objective is to help our students become self-directed learners. A key tool in this effort is the Insights dashboard, which will be the focus of our discussion.

In this course, you'll learn how to effectively utilize the NBME Insights dashboard to interpret assessment data and support student performance. Throughout the course, we will be utilizing the Insights Interactive Demo, available on the NBME website, which features sample data designed to showcase the full range of Insights capabilities across a medical student's educational journey. This data is for instructional purposes only. Actual examinee results, score reports, and testing timeframes will vary.

In module one, we will begin with an introduction to Insights. You will learn how to navigate the dashboard to locate assessment results, identify the types of assessment data available, and gain a high level overview of the four main tabs used to display assessment results. In subsequent modules, we will explore in greater depth how to analyze and interpret the data to support student performance.
